

# Did you know?

It just doesn't make sense to discard items that could be used or recycled again.

**"WHAT A WASTE!"**

**City of Victorville residents and businesses discarded approximately 79,000 tons of trash in 2007?! That's over 6,500 tons per month...over 1,500 tons per week...and over 300 tons per day (5 day week).**

**It cost City residents and businesses an estimated \$2,809,240 to dispose of all that trash.**

**Contractors, builders, and "self haulers" to the landfill disposed of an additional 26,400 tons of trash in 2007. All this trash went to San Bernardino County's Victorville Landfill off of Stoddard Wells Road.**

**Based on waste generation studies by the CA Integrated Waste Management Board, it is estimated that over 41% of that "trash" could have been recycled or composted instead.**
